MINING, BUSINESS AND STOCKS

SEARCHLIGHT IS MOST ACTIVE NOW

Santa Fe Connects Camp With Outside World-General Boom Results.

BUSINESS BIG FROM START.

Mines Are Receiving Needed Machinery and Development is to be Commenced in Earnest.

Special Correspondence. Searchlight, Nev., April 9 -The first train over the Santa Fe railroad's Manyel branch arrived in Searchlight Monday noon, and brought in the first consignment of machinery and lumber for mining purposes. The advent of the train was the signal for a general revival of business in every line, and the first day saw a decided change in the aspect of the camp. Outlying properties that have been dragging along for the want of material, immediately began increasing their quota of workmen, and the next 60 days will be a period of great activity, for hundreds of carloads of machinery and material are due to arrive in that time. Another bright aspect of the district is the labor situation which has not been disturbed by events transpiring at Goldfield and other northern camps. Being an open camp, everyone is prosperous, well paid and free from agitation.

Among the first mines to receive machinery is the Searchlight Mammoth, which will begin installing a large hoisting plant immediately, and with its present machinery will beene of the best equipped mines in the district. Three carloads of machinery arrived for the Searchlight Constituted and is now being installed.

STANLEY FORBES. consignment of machinery and lum-

STANLEY FORBES.

The most sensational gold strike ade during the week was that at the tanley Forbes, where workmen while inking a winze, opened five feet of spartz that runs an average of \$200 per ton. The winze is 25 feet deep, and was sunk on the vein in a tunnel 200 feet in the hillside. The ora body is traceable to the apex of the hill carrying an average width of three feet above, and values ranging from \$100 down to \$25. Papnings taken from the new find show a teaspoonful of free gold to the pan, and a sixinch streak on the hanging wall in the winze runs as high as \$10,000 per ten. The fancy article will be shipped by express. The company has leased the New Era mill and will begin treating its ores immediately.

WYOMING SEARCHLIGHT. WYOMING SEARCHLIGHT.

The feasibility of mining on the "Flat." west of Searchlight, has been demonstrated by the Wyoming Searchlight, which this week cut into a 30 foot ore body that averages \$35 per ten. The find was made in the west drift on the 200 foot level in an incline shaft that is now 300 feet deep. Drifting for the shoot below has commenced. The mine will make a mill run test at the Duplex mill this week, and if satisfactory will immediately install a 10-stamp mill and cyanide plant.

MAJESTIC GOLDFROG.

The shaft on the Majestic Goldfrog has reached a depth of 85 feet and is showing some good mineral. Arrange-ments have been made for the imme-liate installation of a 15-horse power Februarie Morse holst torscher with Fairbanks Morse hoist together with other equipment. Pannings from the pottom of the shaft show values to be consistent and the shoot given indications of developing into a permanena ore body. At the 100-foot level a will be driven to explore

GOLD BEAM

The showing on the Gold Beam, where a few weeks ago a nice body of min-ralized quartz was encountered, is imranged quartz was encountered, is improving with each foot of depth. The first assays showing the presence of mineral have been overshadowed by retent developments, which have brought in a nice streak of pay rock. This shaft will be continued down by Superintentiant Sayles, who is after the water evel, where rich ore predominates.

BLACK HAWK STRIKE.

C. L. Gresh, owner of the Black Hawlerlaim, which enalines the Wall Street an the east, has uncovered five feet of ore in the bottom of a 50-foot shaft, that runs \$200 per ton. This ledge is the extension of the Wall street, and is traceable the entire length of the Black Hawk calm. Machinery and a full quipment will immediately be installed and the property developed rapidly. ELDORADO CONSOLIDATED.

Superintendent A, J. Peake of the Elforado Consolidated, has opened a
ledge of gold and sliver ore that asrays up to \$100 per ton. The find was
made in a 50-foot shaft, and the entire
workings are in ore. The ledge is a new
me rand runs parallel to the monster
cein in the fatnous sliver Legion. The
ledge is well defined and traceable the
matire length of the claim. The present
shaft will be continued down to the
100-foot level, when cross-cutting and
deliting will begin.

WORK AT THE MIDAS.

Work at the Midas.

Working this week completed the innalistion of additional machinery on the
Midas, and the mine has now a good
working plant. The contract calling for
106 additional feet of sinking is now go.
hig shead with great rapidity, as soon
as the additional depth is attained,
irlining will begin to the east of the
than to open a ledge than outcrepe
troughy on that portion of the propery. The rich stringers encountered
while sluking the first 100 feet trend trengiy on that portion of the property. The rich stringers encountered while sinking the first 100 feet trend soward this ledge and it is believed they torm a juncture at the water level. The retivity on the Midas has inspired the activity on the Midas has inspired the activity of the property holders in the amny other property holders in the vicinity to begin prospecting for ledges.

GREAT FALLS TROUBLE.

Representatives of Workmen Confer

With John D. Ryan, Butte, Mont. April 12 .- John Butte, Mont. April 12.—John D. Byan, managing director of the Amalgamated Copper company, conferred with a committee representing the blacksmiths, machinists and electrical workers of Great Falls, at that city, thursday. Mr. Hyan was called there on the invitation of the Union, which igreed to return to work at the old scale until a permanent arrangement rould be made with the company.

FINDS GOLD ROCK. Provo, April 12.-Walter Parkes, gen

come a trip to keph, where he has een looking over some gypsom propositions. He has brought with him, in ddition to samples of gypsom, some old rock of which he says there is a trip to the ton-but it should alke a rock or the ton-but it should alke a rock of which he con-but it should alke a rock evaluation. ake a good cyaniding proposition. Mr. trks also obtained samples of some a mineral paint, which apparently certain percentage of

and should prove valuable. AJAX IS PROSPEROUS.

Among the good things in Utah there is none any more attractive than the Ajax, now selling in the local market around the 32-cent mark. This company is incorporated for 100,000 shares at \$1.0 per share and of this amount 45. at \$10 per share and of this amount 45.200 shares are reserved as treasury stock. By working ore bodies opened up from time to time and sending consignments to market the mine has paid all expense incurred in developing and operating the property and has saved \$13,000 besides. The 1,000-foot level looks especially fine and important developments are under way. The Ajax is in a position to pay I cent per share per menth and could start doing this at any time.

BIG GENERATOR IS ON THE GROUND

Utah Copper Company's Concentrating Plant at Garfield Progressing in Good Shape.

TO HANDLE ORE IN 30 DAYS.

itas a Capacity of Six Thousand Tons Every Twenty-four Hours The Year Round.

The Utah Copper company's concentrating plant out at Garfield is progressing in good shape, and one-half of the plant will be ready to start its ore-handling within the next thirty days. A 3,000-horse power electric generator from the General Electric company's factory, has just arrived at the ground and is now being unloaded and put into place. This is the third of a series of five generators to be talled. Two 2,000-hourse power genors have been installed and are w ready to be put into motion. With a newly arrived machinery in place chalf of the plant will be completed, ree 3,000-horse power powermaking filts are yet to come, and are expect-to reach the mill most any date, is expected the entire plant will be ming within the next two months, linarily thirty days are consumed in talling a generating outfit, but unal steps are being taken to hurry mpletion of the Utah Copper's mill, the branch railroad from Bingham a been completed for some months i just as soon as the mill has had "try-out" a big event in Utah's ling circles will follow. The plant one of the largest concentrating is in the west, having a capacity of 0 tons per 24 hours. All machinery i equipment is of the largest, most verful and modern make, and when e in operation, there will be no inturptions or shut downs. ready to be put into motion. With

PIOCHE IS EXPECTANT.

rict Will be Nevada's Best When

Railroad Reaches Its Mines. ith Mr. Mendenhall of the firm of Bros. & Mendenhall, railroad lers announcing that work on the nete-Ploche branch will be started in a week and that the road, itself be opened by July 4 and with its es improving with each additional of development work in former will be opened by July 4 and with its mines improving with each additional foot of development work the famous old camp of Pioche is on the verge of a big substantial beom. Probably the coming of the railroad is most important of all—the district always had the mines—now it is to get the transportation facilities longed for these many years. The grade is in advanced shape; when work is started it will be actual construction. The Sait Lake Route's main line is again open for through traffic and with the resumption of travel over the main line the builders can again turn their attention to the Pioche branch. The men and materials essembled at Callente many weeks ago in preparation for commencement of work on the Pioche branch were put to work on the main line when it became washed-out and for some weeks patient old Pioche almost gave up hope of having a line within a year. The good news that the wash-outs nave been repaired now promises that the scream of the eagle and first engine's whistle will mingle in the long-isolated camp July 4.

A significant transaction was the

A signifigant transaction was the purchase of the Ida May property by W. A. Clark jr. This sale was reported in this city several days ago and now that those interested in Ploche have had time to think over events they see clearly that the Clark family believe in Ploche most confidently and intend to have a share of the good things—made good by the building of its railroad. Mr. Clark is going to visit the camp tomorrow and it is expected the new company will have its plans perfected. The Ida May Extension, next door neighbor of the Ida May, is looking so promising that machinery has been ordered and is now enroute from Los Angeles.

been ordered and is now enroute from Los Angeles.

Recent discoveries are proving that within twenty-five miles of Pioche there will be developed some of the greatest copper propositions ever known. The showings at the Bristol Copper company's properdes are marvelous. A force of thirty men is at work and immness bodies of ore are being blocked out. Owing to the present lack of transportation facilities the ore cannot be shipped and is being stored where ever room can be found. stored where ever room can be found. Hugh bins are filled to their tops. A hoist and a compressore are being in-stalled. All districts immediately sur-rounding the Ploche and Bristol terreunding the Ploche and Bristol territories are coming to the front and
there will be no end of activity when
Ploche can send her ores and those of
her neighbor's mines direct to the markets. Salt Lake capital is heavily invested in the district and for this reason
every item in the district's growth
means much for this city.

NESLON QUEEN TUNNEL.

Big Bore Will Open Ore and Drain Mine-Conditions Excellent.

The Nelson-Queen Consolidated Minig company of the district of that ame east of Park City is demonstratthat perseverance conquers all. ing that perseverance conquers all. It is deing more in proving up an entirely new district. Plans for the future include the driving of a long tunnel and the expenditure of big sums for exploratory work. President W. C. Wilkins left yesterday for New York, where business pertaining to the company will make it necessary for him to remain two months. Work at the mine will go ahead energetically as 200 feet of ore body already blocked out assures the supply for a long season of shipthe supply for a long season of ship-ping. More ore is to be blocked out and a compressor and bollers are to be in-stalled to expedite development. When the roads become passable shipping will commence at once and will be carried on in a manner, which

shipping will commence at once and will be carried on in a manner which will overcome the results of a long winter. hTe company will soon have the nice sum of \$25,000 on hand and with this it can carry out its plans regarding further development and the driving of the long tunnel. This latter proposition has been under consider. regarding further development and the driving of the long tunnel. This latter proposition has been under consideration for a long time. Prof. O. E. Palmer reported favorably upon the scheme some time ago and it was then startically decided to build it. This will serve two purposes—first in opening the lower depths of the property in good shape and second in draining the mine of water. It will be started upon he west side of the property and will be run upon the 9,000-foot copper vein which crosses the entire property. Surface croppings at the point where the tunnel is to be started go two and a half er cent copper with some gold and silver values, while 12 per cent copper is obtained from a 60 foot shaft on the same vein. It is believed many cross fissures will be cut and followed to other big ore bodies. Prof. Palmer,

SUGAR STOCKS.

Have been growing in market value for the past six months. In that time the selling price of stock in both The Idaho Sugar Company and the Western Idaho Sugar Company has steadily advanced, and both companies have been put on a dividend paying basis. In our judgment the rise in value will continue. For this reason all who can keep their stock should do so. If you cannot well hold your stock let us sell in for you. To those who wish to buy now is the best time to invest your money. A little Western Idaho Sugar stock can be bought at par; and some Idaho today at \$8.50 per share. The former pays 7 per cent and the latter 6 per cent per annum dividends on par (\$10 per share).

GEO, M. CANNON CO.,

Rooms 512-513 Templeton Building.

a well known, conservative and clever expert visited the Nelson-Queen recent-ly and said it was a good mine and told its owners not to hesitate in expending thousands in opening it as every cent will be return ten fold.

WYOMING HAS GOLD

Little Big Horn is to be Worked Thoroughly by Dredging.

(Special to the "News.") Sheridan, Wyo., April 12,-Extensive gold dredging operations are soon to be undertaken by the Gold Standard Mining, Milling and Improvement com-Mining, Milling and Improvement company in the rich placer lands along the Little Big Horn river in Sheridan county. These lands in addition to values in free gold running over \$1 to the cubic yard, carrying about three per cent of black sand or magnetic iron. The company is to use an exclusive process for saving the gold values, the wet sands being run through a series of magnets which catch and discharge the heavy magnetic iron. The tailings are to be treated by cyaniding.

GOLDFIELD'S PROSPERITY.

Market Conditions Appear to Have Little Effect Upon Various Enterprises. Special Correspondence.

Special Correspondence.

Goldfield, Nev., April 9.—Present stock market conditions are having little effect upon the actual prosperity and prospects of the local mining industry. Even in the case of Nevada mining stocks, their intrinsic values have not been affected by market fluctuations; and the renewal of activity in the camps with the coming of spring is indicative of what may be expected in the way of actual production curing the coming months. A number of railroads deals of great importance have lately been put through which will result in the opening up of very large mineralized areas in Nevada hitherto regarded as practically inaccessible. Trains will soon be running from Monterey to Fresno, San Juan and Hollister. This line will undoubtedly be completed in Goldfield by the end of the year. The expected inrush of miners into Goldfield has already started; they are coming by trainloads from Los Angeles as well as from Denver and points further east. The one great fact that cannot be argued away is that men are making money in Nevada mines; and while they continue to do so, the holders of high-grade securities are manifesting no special anxiety to close out their stocks or forego their chances of future profits. The mining situation is regarded by local brokers and business men as on a sound basis with the prospect of a record-breaking production for the season now opening. spect of a record-breaking production for the season now opening.

CONCENTRATES.

J. Oberndorfer has returned from month's trip to New York. R. H. Grieves is in Ely on business. He will return to this city in a few

days. 3,200-horse power generator for the Telluride Power company's Battle Creek station near Pleasant Grove, is being unloaded at the station. This is one of the General Electric company'

latest. house Mines & Smelter's corporation and Frank A. Shirmer of Boston re-turned from those propertis yesterday. turned from those propertis yesterday. Mr. Shirmer leaves for Yerington, where he will examine a number of

properties. Frank McIntire of Salt Lake has filed suit against the Mines Development company of Ely to recover possession and title to two mining claims in the Blackhorse district, which he alleges he transferred to the company for a block of company stock, the value of which was misrepresented to him.—White Pine News. Frank McIntire of Salt Lake has

E. Drake, district freight and passenger agent of the Rock Island route, left this afternoon for Chicago. Mr. Drake expects to be absent two or three weeks. While away he will incidentally interest capital in the Hecla mining company, of which he is a member. The property is situated in Beaver county, and is said to be a bonanza.

The annual meeting of the Montgomery Mountain Mining company was neld in this city yesterday. Nearly 1,-00,000 shares were represented, and the old board of directors and officers were re-elected, as follows: Samuel New-house, president; D. H. Peery, vice president; E. H. Mead, secretary and treasurer; C. C. Parsons and C. E. treasurer; C. C. Parsons and C. L. Loose. The mine is in the Bullfrog dis-

The Crown Point Consolidated Mining company of Provo has filed a copy of its articles of incorporation with the secretary of state. The capitalization of the company is \$100,000, divided into shares of the par value of 10 cents each. Jesse Knight is president, Joseph Wirthlin, vice president; W. Lester Mangum, secretary and treasurer. The company owns the Goshen group of seven claims, located in the Tintic district, Utah county.

President Henry Catrow and Man ager A. J. McMullen of the Beaver Copper company, an Infant in that district have returned from the property. Men and materials are to be assembled hurriedly and work will be started on the first of this month. Surface grading for buildings will be the first item and a 500-foot shaft is to be sunk as rapidly as men and money can do it. rapidly as men and money can do it.

Various working buildings wil be erected as needed. President Catrow went through the present workings of the property and gathered a lot of samples which ran from a trace to 12 per cent copper and from as high as 46 ounces in silver. ounces in silver.

BEARS RAIDED UNION PACIFIC

Forced That Stock and Reading Down, Prices Generally Giving Way in Sympathy.

WELLS-FARGO FELL 15 POINTS

Stocks That Were Conspicuously Weak Yesterday Were the Weakest Woday.

New York, April 12.-Oepning transactions in stocks were light and prices were fraction lower all around.

Values declined on an increased volume of bulness. When the decline had reachof bulness. When the decline had reached 1 to 2½ in a dozen or more stocks, support became effective, and the list recovered sharply. This buying, however, was not protracted and the list give signs of weakness again. Stocks that were conspleaous in yesterday's market fall in prices were again the weaknest. Northern Pacific and Smeiting declined 2½, Anaconda 2½, Canadian Pacific 2½, Analgamated Copper 2, Union Pacific 2½, Analgamated Copper 2, Union Pacific 2½, Analgamated Copper 2, Union Pacific 2½, Analgamated Copper 3, Union Pacific 1½. Prices were hardening at 11 o'clock. The rally stopped short of a complete recovery and left the market intensely dull with prices almost motionless. Bear operators selzed the opportunity afforded by the absence of demand to attack Reading and Union Pacific again and forced them to a fraction lower than in the morning. Prices gave way generall, in sympathy.

Certain stocks were depressed further but the market as a whole did not move much. Reading was lowered 2 points. A subsequent raity rangong up to a point in Union Pacific and Reading was not sustained. Wells-Fargo [el] 15 points.

GEN. DUGGAN RETIRED.

Washington, April 11.—Brig. Gen.
Walter D. Duggan, recently relieved
from duty in the Philippines, was today placed on the retired list on account of age. Col. Charles B. Hall, of
the Eighteenth infantry, becomes brigadier general by reason of Gen. Duggan's retirement, but will retain his
present station and duty at Fort Leavenworth, in charge of the military staff
college.

Lost Vigor Restored

We treat MEN only and our experience in the past assures our patients straightforward and satisfactory treatment for the future. Many a MAN has lost his grip through brooding over his condition because he imagines he cannot be curred. To such we say investigate our methods of treatment and place yourself under our care and your weakness will disappear and conditions will be restored for the future. Our freatment has proved to be the best yet devised for restoring LOST VIGOR and that physical and mental incapacity which has made a wreck of so many. Our freatment for NERVGES DEBILITY does not stimulate temporarily but permanently. It stops every drain of VIGOR and builds up the muscular and nervous system—revices the spirits—brightens the intellect and above all restores the WASTED POWERS. Sometimes organic weakness and LOSS OF VIRILITY arises from VARICOCELE and STRICTURE in such case we have to get rid of the canse before we can obtain good effects. Too often these causes are overlooked and so in spite of any and every treatment the case does not progress and the patient often goes into physical and mental decline through want of success in curing his LOST VIGOR.

We take no case we cannot benefit or cure so you run no risks. We treat MEN only and our exper-
